Hi-Force®
HYDRAULIC TOOLS

GENERAL SAFETY

Always wear the correct personal protective equipment.

Remember always think safety, and if in doubt seek professional help from **Hi-Force!**

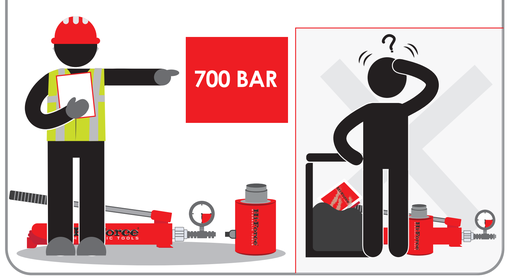

1 Always read the operating manual prior to use

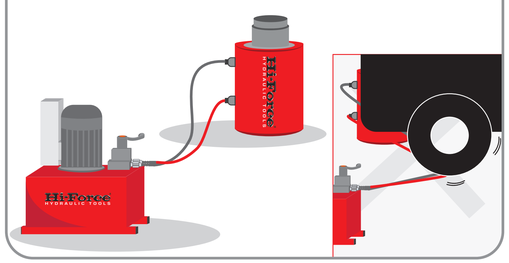

2 Always inspect the hydraulic equipment before and after every use

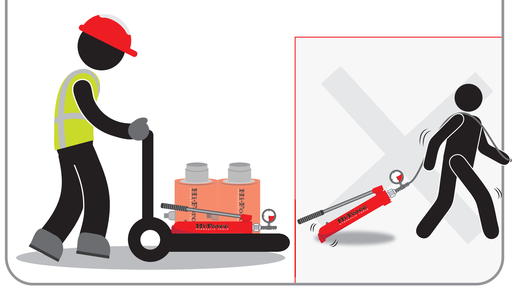

3 Ensure that all system components have the same matching working pressure

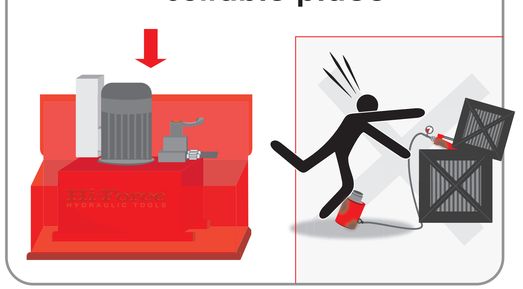

4 Avoid kinks and sharp bends in hydraulic hoses

5 Transport heavy hydraulic equipment carefully

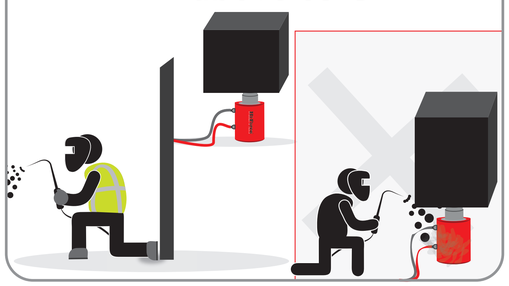

6 Store your hydraulic equipment in a suitable place

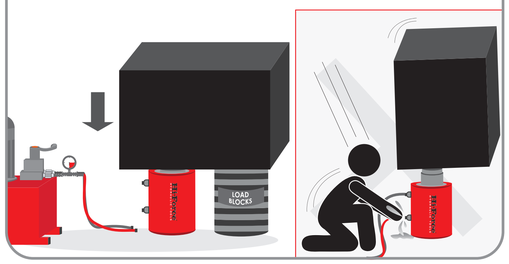

7 Use the correct hydraulic fluid as specified by Hi-Force

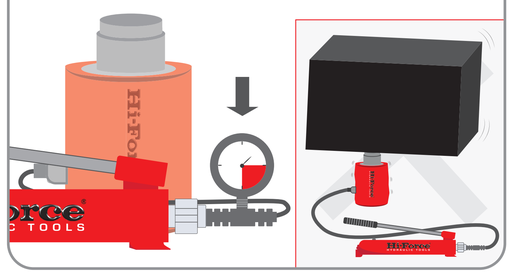

8 Keep hydraulic equipment away from temperatures above 65˚C

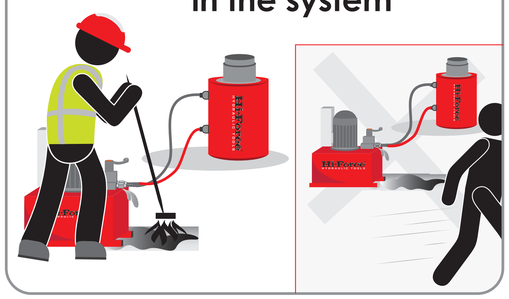

9 Release hydraulic pressure before disconnecting and connecting fittings

10 Use a suitable pressure gauge to monitor the system pressure

11 Investigate immediately any trace of oil leaks in the system

12 Have your Hi-Force equipment serviced by an accredited Hi-Force Service Centre
