Tamtron DV POWER is the ideal scale for dumper trucks. Thanks to the standardized angle compensation technology, reliable weighing results are now guaranteed in all working conditions, even on uneven surfaces. Dynamic scale is easy and quick to use and allows operating the dumper in normal pace.

Maximize your loading efficiency!

- Drive always with safe and legal loads
- User-friendly and functional onboard scale
- Operate the truck normally without stops

DV POWER – useful onboard scale for dumpers and articulated trucks

Having DV POWER scale onboard serves three main functions:

- **Optimizing use of the vehicle and fuel consumption**
- **Displaying transported quantities at the loading site**
- **Preventing overloading and reducing wear and tear of the vehicle**

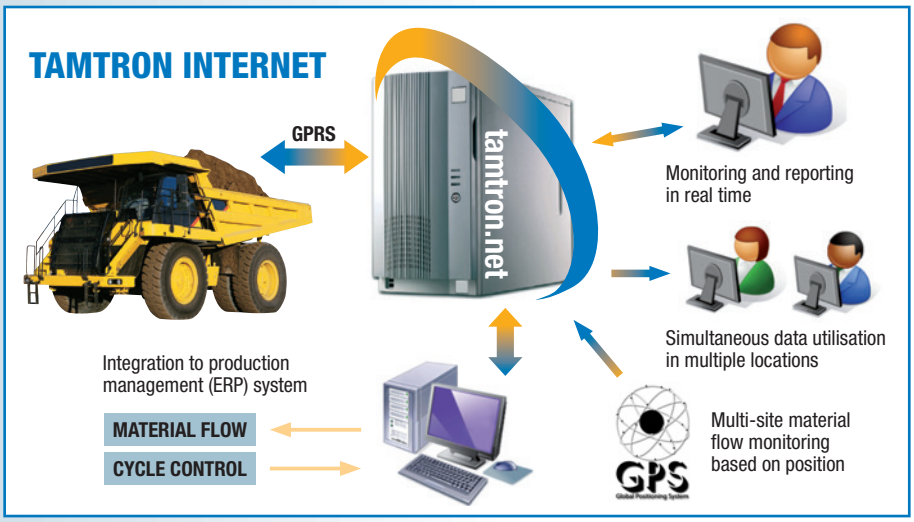

Knowing transported quantities allows monitoring production and thus improving overall process control. Scale provides firsthand information on the transport cycle times and therefore helps to optimise the logistic chain starting from the choice of loader. As the scale indicates the required load quantity at the site, using the loader is facilitated.

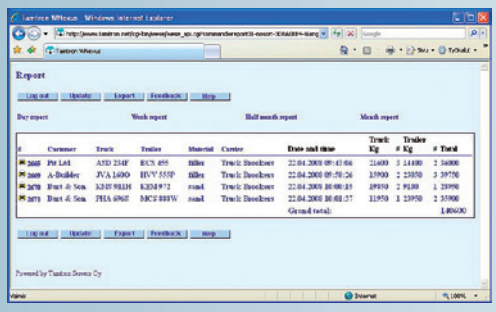

1. In-cab display
2. Weighing sensors
3. Exterior loading indicator lights

DV POWER can also be mounted on articulated dumper trucks.

Web-browser interface allows access by using virtually any kind of device from office PC to mobile phone.

Tamtron's internet service enables easy reporting.

Options:

Optional solutions are based on the latest RFID and GPRS/GPS technologies to improve control of the stock and processes

- **iStock:** Advanced stock management system allows monitoring the contents of the warehouse in real-time.
- **iFocus:** Monitoring operation times online optimizes the use of the dumper truck.
- **iMobilizer:** Automatic log-book identifies different users and keeps records particularly at non-manned locations.
- **iLocation:** The scale sends out the GPS location of the weighing vehicle to an online service. Combined information on weight and location helps to optimize cycle times and results in significant cost savings.
